

Gurek Singh

Product Generalist
UX Systems Designer
AI-Native Builder

Versatile product thinker with 5+ years of experience across Product Strategy, AI-led Feature Development, UX Design, and qualitative product-led experience improvements.

Currently focused on AI-driven personalised content systems, Vector DBs, RAGs, graph knowledge bases, and stock market UX.

Before this, I was a 0→1 product designer — so I prototype fast, think in user flows.

Looking to work on bold AI-first problems where I can own end-to-end execution.
